Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear of the claimed “a center point of the current ... that corresponds to a **relative** direction of the distant location **relative** to the center point of the current displayed map image” how is the center point corresponds to a relative direction of the distant location? and relative to the center point of the current displayed map image?

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-3 and 19-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Koizumi [US 6,462,676].

Regarding claim 1: Koizumi discloses a map display device comprising:

- an input unit (99);
- a display unit (95) configured to display map images (Fig. 9A-9B);
- a control unit (103), see Fig. 5;

-a current displayed map image (Fig. 9A) with at least one user selectable distant map name (met by a remote map name 30 e.g. YURAKUCHO) corresponding to a distant (remote) location (shown in Fig. 9B) that is not located in the current displayed map image (Fig. 9A), said control unit being configured to switch from the current displayed map image (Fig. 9A) to a new displayed map image (Fig. 9B) in response to a user input command such that the new displayed map image represents an area (streets and facilities names) including the distance (remote) location corresponding to the distant map name (YURAKUCHO) selected by user input command [see Fig. 8A-9B col. 10, lines 1-12].

Regarding claim 2: Koizumi further discloses that the distant map name display on the display unit in a peripheral part for the display unit [Fig. 10B] from a center point (lines met) the corresponds to a relative direction of the distant location relative to the center point of the current displayed map image [see col. 11, lines 51-62].

Regarding claim 3: Koizumi further discloses that an intra-map name (current location name, NIHONGASHI) corresponding to a displayed location that is located in the current displayed map image [see Fig. 8A].

Regarding claims 19-21: Reject as same consideration of claim 1 above.

Art Unit: 2632

Allowable Subject Matter

5. Claims 4-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

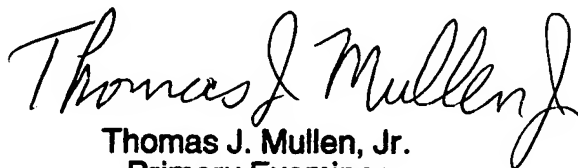

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hanabusa et al. [US 4,737,927], Arakawa et al. [US 5,617,319], Ito et al. [US 5,908,465] and Tanaka et al [US 6,477,461].
